Conference Theme

We are interested in a variety of different sessions that relate to our theme of making evaluation accessible. The accessibility of evaluation can take multiple forms, from how evaluation methodology and data collection approaches are designed; to communication and dissemination approaches; to how evaluation incorporates social justice, race, and class; to visual data representation.

Session Types

The style of a session may include the following (we are open to alternative session styles as well) :

- **Workshop:** Workshops teach a specific skill needed by many evaluators. They show how to use or apply an evaluation concept/tool and may include one or more exercises that let attendees practice using this skill.
- **Panel:** This formal, thematic, presentation focuses on an issue facing the field of evaluation. The overall abstract is to provide a coordinated presentation by two or more panelists, and possibly a discussant, on the general topic of the panel.
- **Expert Lecture:** Expert Lectures are presentations by a single expert in the field who will share conceptual or methodological innovations through a lecture followed by a Q&A.
- **Think Tank:** A Think Tank is a session focusing on a single issue or question. Initially, a chairperson orients attendees to the issue or question and relevant context. Then, attendees break into small groups to explore the issue or question and finally reconvene to share their enhanced understanding through a discussion facilitated by the chairperson.
